For Immediate Release  
April 29, 2013

**Emergency Management Division**  
**Flood Update**

**Kent County** – Waters are receding and some of the damage assessments are starting to be tallied by the Kent County Department of Equalization tonight. Personnel from cities, townships and villages that were affected by flooding, as well as volunteers, started logging damage assessments around Kent County last week. The state has requested the county report a preliminary damage estimate tomorrow, but it could be several weeks before a final calculation of the damage is determined. “Now that more water has receded, teams are able to get to more areas for general assessments, said Jack Stewart, Emergency Management Coordinator. “There are still areas that are difficult to access. We will be able to do more comprehensive assessments in the coming weeks.”

A number of organizations have been instrumental in helping residents with shelter, clean-up, and other human services. “The help of these organizations, such as the Heart of West Michigan United Way, the American Red Cross, the Salvation Army, the Southern Baptist Convention and so many others have kept our residents safe, warm, and fed during this disaster,” Stewart said. Anyone needing shelter should call 211. American Red Cross has cleaning kits available. Call 616.456.8661 for more information.

Kent County Emergency Management Division remains concerned about debris, swift current and safety issues. The **No-Contact Advisory** remains in effect for the Grand River until further notice. **DO NOT come into contact with the water until the advisory is lifted.**

Last week, Kent County Commissioners approved an extension of the local State of Emergency, to give personnel time to accurately complete damage assessments. The local State of Emergency declaration, signed April 19, remains in effect for all Kent County villages, townships and cities, through May 24, 2013. This process is necessary to determine if Governor Rick Snyder will issue a Declaration of Disaster; a step towards requesting FEMA funding or assistance.

Updates and information on the flooding can be found at [www.accessKent.com/News](http://www.accessKent.com/News). If you require additional information (or an on-camera interview) please contact Jack Stewart, Kent County Emergency Management Coordinator, at 616.632.6255, Undersheriff Jon Hess at 616.632.6236, or PIO Lisa LaPlante at 616.632.7182.

1. If you were evacuated from your home, DO NOT RETURN until authorities say it is safe to return. Local officials are working to determine when it is safe for residents to return to their homes, and with Consumers Energy to restore power when safe. If your power is out and/or your gas shut down, do not attempt to turn these on yourself. Do not light matches in a house or business until it is deemed safe. More information at:

<http://www.accesskent.com/Health/EmergencyPrep/pdfs/CleaningUpFactSheet.pdf>.

2. The no-contact advisory for the Grand River throughout ALL of Kent County will remain in effect until further notice. Concerns include a fast-moving current, debris, and contamination. Our first responders have had to save several people who ventured into the water (via kayak or raft) and ended up in trouble. **Stay out of the water - period.**

3. Many residents may be using generators for power or kerosene heaters. Use these items carefully:

- Read and follow the manufacturer's operating instructions before running any equipment;
- DO NOT use a generator inside your home, garage, crawl space, or other enclosed areas. Fatal fumes can build up;
- Generators should be located in a dry area outdoors, away from open windows, vents, or doors;
- Keep a battery-powered carbon monoxide detector near the area where you are running a generator;
- Do not use heaters or generator near combustible materials.

4. Many areas within Kent County have been affected by flooding, and some of your water supplies may be vulnerable. Floods can damage drinking water wells and lead to ground water and well contamination. Contaminants such as bacteria and chemicals may enter the water supply if your well is flooded, damaged, or if there is a loss of pressure in your water supply piping. Ingesting contaminated water can cause stomach illnesses which can be especially severe in the elderly, in children and those with weakened immune systems. In the event that your well has been flooded or damaged, then there are steps that you should follow to ensure that your drinking water is safe. The purpose for this notice is to advise you if you have a well that is flooded or damaged, then do not use the well water for potable use such as cooking, drinking, food preparation, bathing and brushing teeth. Follow these steps if your well has been affected:

- Do not use the well water for drinking, food preparation, ice making, food contact, bathing or brushing your teeth.
- Use bottled water for potable use.
- After the flood water recedes, flush the well thoroughly and have the well and affected plumbing disinfected prior to use. Due to the electrical, well construction and safety issues involved in this process, contracting a registered well driller or master plumber to do this work is recommended for safe and effective treatment and repairs.
- Test your water for contaminants after all chlorine has been flushed from the water supply. Collect the water samples before using the well water for potable use such as cooking, drinking, food preparation, bathing or brushing your teeth. At a minimum you should collect bacteriologic samples. Draw water from a drinking water outlet to get two consecutive bacteriologic samples that are collected a minimum of 24 hours apart, which do not detect the presence of contamination before allowing potable use of the tap water.

Repeat testing one to two weeks later is also recommended to ensure that the source of the contamination has been eliminated. The Kent County Health Department recommends that all well owners test their water annually to ensure that the water quality is safe for consumption. Bottles for testing are available at the Kent County Health Department, 700 Fuller NE in Grand Rapids, KCHD satellite clinics, and township offices throughout Kent County.

5. Clean and disinfect businesses and homes where the flooding occurred within 24-48 hours of returning. Wear gloves when handling anything that may have been in flood water or sewage. These areas could have organisms that cause illness to humans and pets. Be careful to avoid sharp metal while cleaning, as cuts can lead to tetanus concerns. More information can be found here: <http://www.accesskent.com/Health/EmergencyPrep/pdfs/CleaningUpFactSheet.pdf>

6. Throw away any food that came in contact with floodwater or sewage, or, if in a freezer or refrigerator, throw out food with an unusual color, odor, or if the temperature is above 45° F internally.

7. Hazardous waste, such as gasoline, insect repellent, antifreeze or motor oil, can be taken to these drop-off sites:

**Transfer station at North Kent Landfill**  
2908 10 Mile Rd NE  
Rockford, MI 49341

**The Kent County Road Commission**  
1500 Scribner NW  
Grand Rapids, MI 49504

**The Wyoming Waste Water Treatment Plant**  
2350 Ivanrest Ave SW  
Grandville, MI 49418

**Kentwood Public Works**  
5068 Breton Rd SE  
Kentwood, MI 49508

## **April 29, 2013 ROADS CLOSED**

**\*\*\*This list is subject to change as conditions change throughout the day\*\*\***

### **North**

Tisdell from 20 Mile Rd and 21 Mile Rd (impassable)  
Mowry from Lehman to Tisdell (impassable)  
Ashley from 7 Mile Rd to M-44

### **Central**

Canright & Briggs  
4 Mile & Briggs  
Forest Ridge & Coit  
West River Dr & Abridador Trail  
West River Center & Abridador Trail  
West River Dr & St Lawrence  
West River Dr & Karcher Dr  
Jupiter & Konkle  
West River & Indian  
Indian & River Point  
Walnut Park & Northland Dr  
Willow Dr & Bailey Park  
Willow Dr & Canright  
Shady Dr & Knapp St  
Reeds Lake Blvd from Duchess to Manhattan  
Reeds Lake Blvd from East Beltline to Hall

### **South**

68th from Wingeier to Pratt Lake  
64th from Pratt Lake to Montcalm  
66th St from Whitneyville to McCords  
108th St from Morse Lake to Moe St  
4 Mile Rd from McCabe to Boynton  
68th St from Pratt Lake to Montcalm  
Causeway Dr

### **Southwest Complex**

92nd St from Ivanrest to Byron Center
