"Measuring What Matters"

Kent County Correctional Facility 2012 Annual Statistical Report

Published on February 1, 2013

KENT COUNTY SHERIFF DEPARTMENT Lawrence A. Stelma – Sheriff

701 Ball Avenue, N.E. • Grand Rapids • Michigan • 49503

February 1, 2013

We began reporting jail data on a yearly basis in 1998, and each new report builds on the foundation of previous reports. I'd like to point out a few items of interest buried in the statistics contained in this year's report.

- In February we had the crane collapse incident which prompted a partial evacuation of some inmates to four other counties. For 19 days an average of 152 inmates were housed in other agencies. This obviously would throw off the averages for the Main Jail and the jail system average, depending on whether I included those "crane" inmates or not. I decided against including them, based on the history described in the note on page 17 which explains that I've never included the inmates boarded outside the jail in the jail counts. In case you are interested what the averages would have been if I had included those inmates, the average for the Main Jail would have been 1,040 instead of the 1,032 reported in this book, and the average for the jail system (all facilities) would have been 1,164 instead of 1,157.
- On page 26 I made note of the fact that the number of parole violators that the Michigan Department of Corrections brought into jail increased last year by 150%. That number is driven almost solely by internal MDOC policies relating to how they decide to handle parole violations. To illustrate the changes over the last few years, I've included the table below:

	2005	2006	2007	2008	2009	2010	2011	2012
MDOC bookings:	318	409	321	115	131	125	311	775

- The average daily population of 1,157 increased 5.8% in 2012 over 2010's and 2011's average of 1,093. That is despite the number of inmates booked into jail decreasing by 0.7% in 2012. That can mean only one thing, which is the average length of stay for inmates in our jail increased. The data confirm that, finding, among other types, the average length of stay for inmates released "time served" increased from 34.6 days in 2010 to 39.9 days in 2012. The average for all inmates who were not released within 72 hours increased from 41.5 in 2010 to 43.9. For the most part, the length of time an inmate stays in jail is not controlled by the Sheriff, and is controlled the judiciary's practice of setting bonds and sentences.
- This was a violent year for inmates in the Kent County Jail. The chart on page 51 depicts that the only measure of inmate behavior that increased this year was the index for violence. Inmate fights, assaults, assaults on staff and threats against staff were up in 2012. Crime watchers will note that there was a similar increase in violent crime in our community in 2012, so the inmates in jail mirror that behavior.

The goal of this report is to provide accurate, interesting and representative information to Sheriff's office staff, criminal justice planners, and community members who are interested in the operation of the county jail. I trust you will find this report to be a helpful source of data in the months ahead.

The report is organized to make the information accessible to the readers. You will notice that it has three general types of statistics. Inmate profile statistics depict an overall profile of the inmate population and correctional facility staff. Inmate population statistics address the topics of how many inmates are coming in, where are they coming from, why they are here, how long are they staying, and some of the programs and services provided to them. Incident statistics allow us to evaluate the behavior of the inmate population while they are in jail.

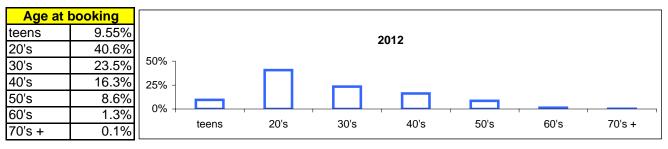

The aim is to make these reports as functional as possible by including only the information that seems to be of general interest. I realize that this document will not answer every question. If you have further questions, please contact me and I will try to provide any additional information you need about the inmate population or facility operation. I value your comments and suggestions for future reports.

Sincerely,

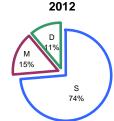

Rang Dry

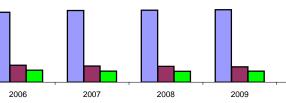

Captain Randy Demory

TrendSpotter! This page contains information about female offenders from this year and previous years. The tables point out some interesting similarities between this year and prior years.

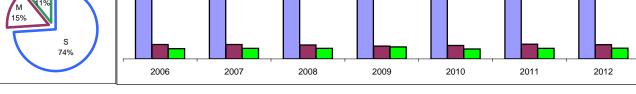

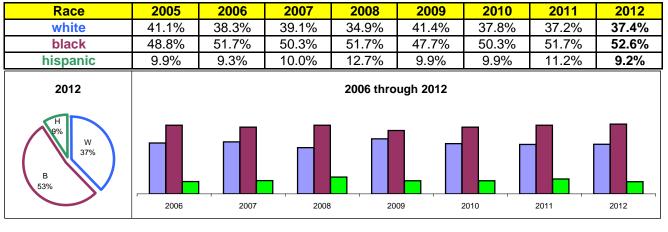

Profile of Female Inmates at Time of Booking (part 2)

Profile of the "Stock Population" Inmates (part 1)

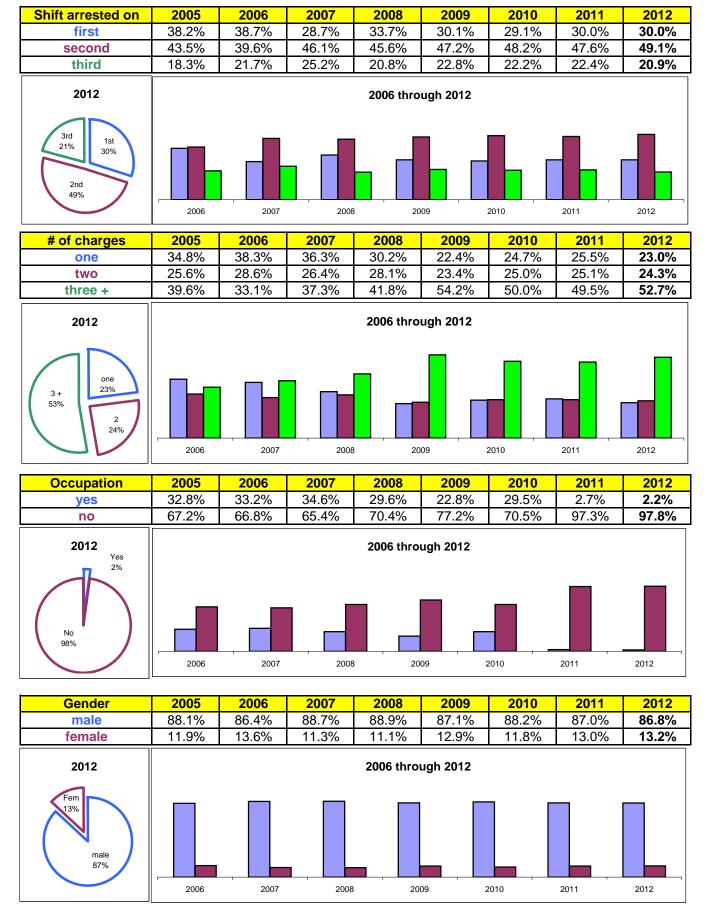

Marital status	2005	2006	2007	2008	2009	2010	2011	2012
single	73.3%	74.6%	74.4%	74.9%	74.6%	76.0%	74.0%	74.3%
married	15.3%	14.8%	14.8%	14.3%	13.2%	13.8%	15.1%	14.6%
divorce	11.4%	10.6%	10.8%	10.8%	12.3%	10.2%	10.9%	11.1%
2012		2006 through 2012						

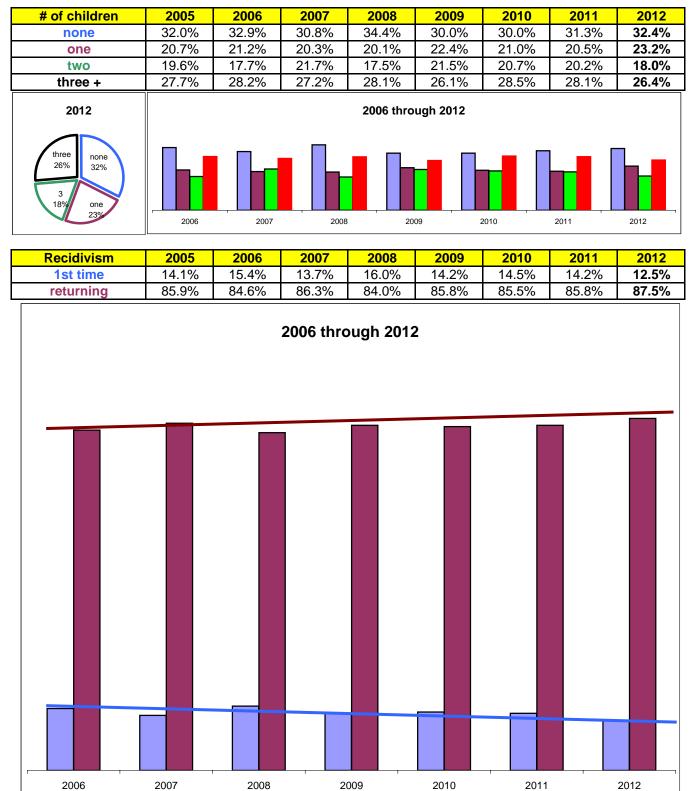

FalkingPoint! For the purposes of analysis, there are actually two "populations" of people who come to the county jail. This page and the next two pages contain information about the "stock" population in jail, while the previous three pages contained information about the inmates being booked into jail. The stock population are the inmates who actually stay in jail after their arraignments and/or initial opportunity to post bail, so they tend to be the more serious criminals. There are many interesting comparisons between the stock population and the total group of offenders coming to jail, as you can see if you compare this page with page "Inmate Profile at Booking." For example, the stock population inmates are much more likely to be repeat offenders, with more of them having been in jail before compared with the other population. Not surprisingly, they have more charges against them than the other population. Interestingly enough, slightly more of them report being single rather than married, and more of them admit to having no occupation. More of these inmates are arrested on first or second shifts, and fewer on third shift. More of them are male. The racial profile of the stock population is also somewhat different than that of the other population.

Profile of the "Stock Population" Inmates (part 2)

Profile of the "Stock Population" Inmates (part 3)

TrendSpotter! This chart depicts the proportion of inmates in the stock population who are in jail for their first time, and the proportion who are repeat offenders. The trend seems to be that the proportion of first time offenders is decreasing and the proportion of repeat offenders is increasing. (trend lines added) The only exception to this trend is female offenders.

Number who were employed in other KCCF positions when they applied	5	3.4%
Other	1	0.7%

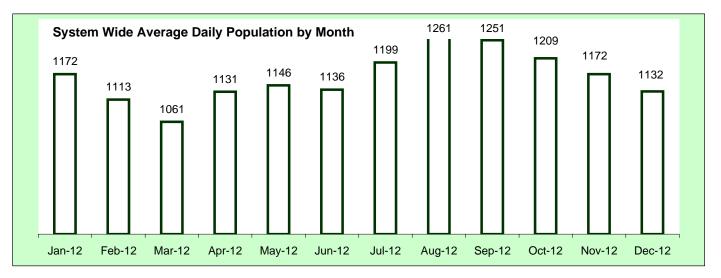

Falking Point! The information contained in the table above was correct as of January 1, 2013. It should be noted that our deputy turnover rate is low when compared with other jails our size around the country. Turnover rates in jails of 10% to 15% are not uncommon, and rates of 25% and higher are sometimes reported.

Booking and Population Statistics Monthly Averages Vary Widely

	bookings per day	bookings per month	total bookings for 2012	average daily population for the MJ, HC & CRC
Average	72	2,110		1,157
Minimum	26	1,881		847
Maximum	108	2,331		1,309
Range	82	450		462
			26,211	

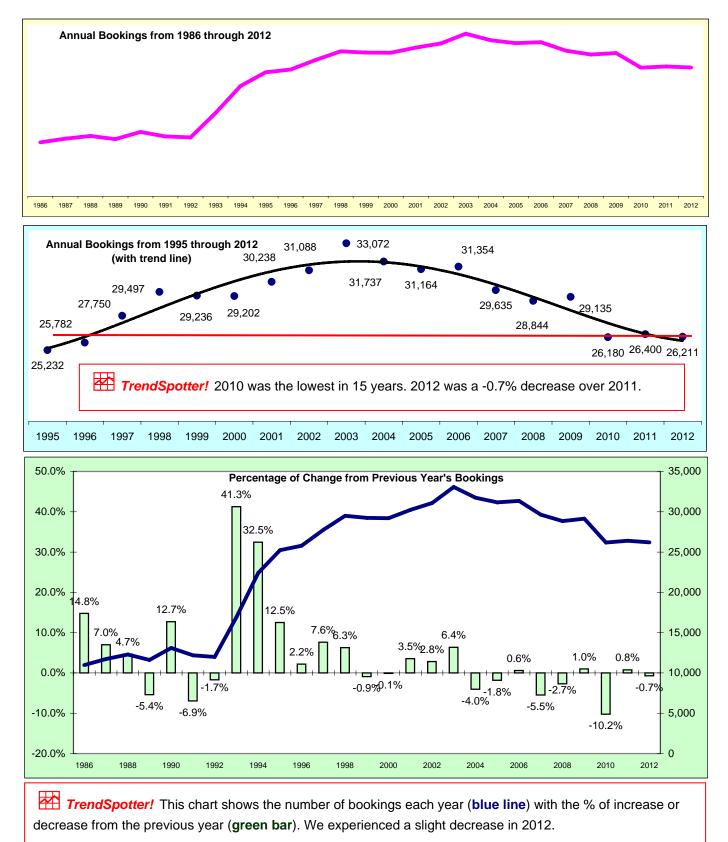

The Average Daily Population of the Main Jail, Honor Camp, and the Community Reentry Center

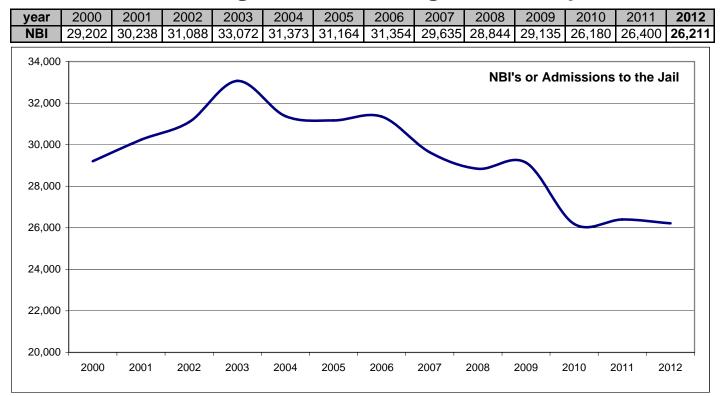

TrendSpotter! The average population for the Main Jail in the year before (2011) was 963. The average population for the Camp was 0 and the average population for the Community Reentry Center was 130 in 2011.

The Number of Inmates Brought to Jail per Year

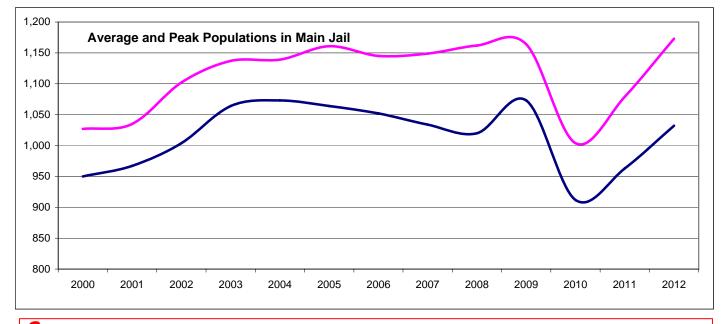

Slight decrease in Admissions (189 fewer)

Number of Bookings and MJ Average / Peak Populations

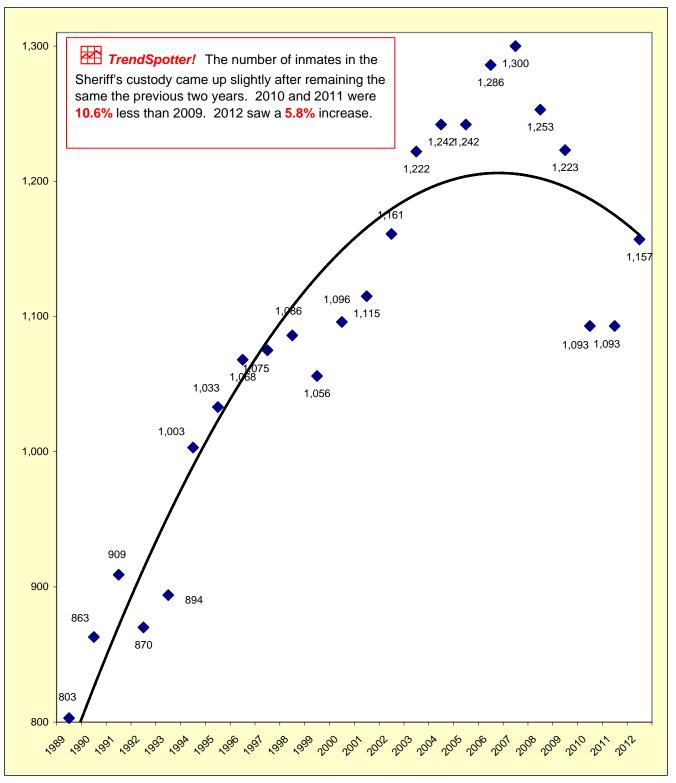

year	2000	2001	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012
ADP	950	967	1,004	1,064	1,073	1,064	1,052	1,034	1,020	1,073	912	963	1,032
Peak	1,027	1,035	1,102	1,137	1,139	1,161	1,145	1,149	1,162	1,164	1,004	1,079	1,173
+ or -	8.1%	7.0%	9.8%	6.9%	6.2%	9.1%	8.8%	11.1%	13.9%	8.5%	10.1%	12.0%	13.7%

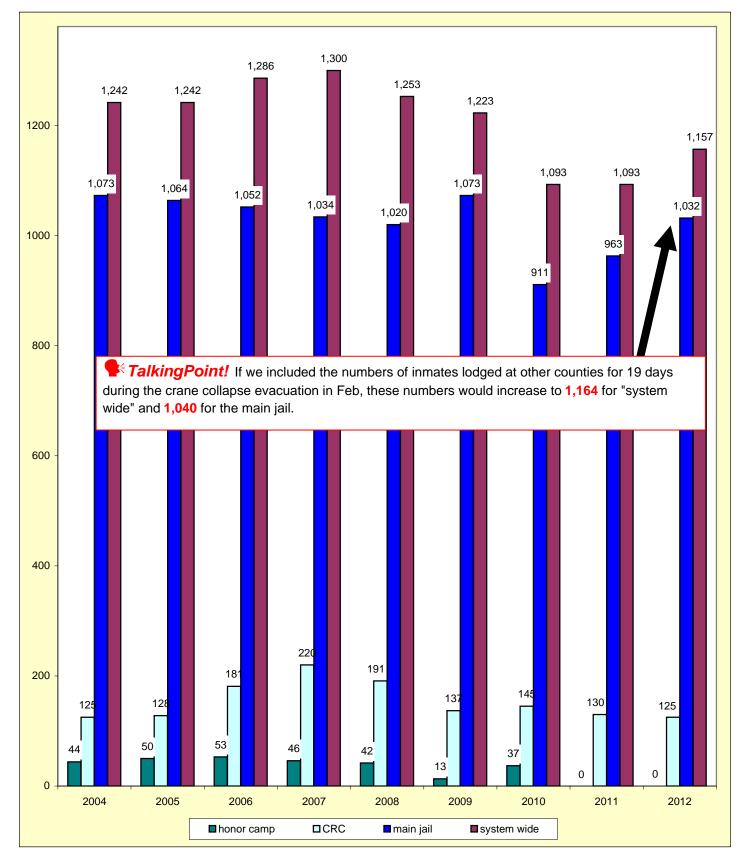

TalkingPoint! The bottom chart shows the difference in the Main Jail between the **AVERAGE** population and the **PEAK** population. In 2012 we had more inmates than average 51.2% of the time, and we have to be able to house them as well. The difference between the normal or "average" population and the peaking population is called the "peaking factor." The peaking factor for 2012 was 13.7%, up for the 3rd year running.

Annual Average Daily Population for all Inmates in KCCF Custody

The figures on this graph represent the daily average of the total number of inmates in our custody, including the Main Jail, Community Reentry Center, and Honor Camp. It DOES NOT INCLUDE inmates lodged in other agencies. The figures prior to 1994 do not include the inmates boarded out in other counties prior to the new jail opening up. The 1997 figure is an estimate because some of the data is missing. Trend line added. One can observe a leveling off of the past growth rate.

Average Daily Population of the Honor Camp, Community Reentry Center, Main Jail and the Total for all Inmates in KCCF Custody for the Last 9 Years

History of Jail Capacity in Kent County (1835 to 1984)

Year	Description of the Event or Solution		Capacit	ty Levels	
Tour		MJ	HC	WR	System
1835	First Kent County Jail consisted of two cells in the corner of the Courthouse				
1845	First jail burns and for the next 10 years inmates are housed in rented quarters, primarily in a cellar of a building on Canal Street, with more important inmates being sent to jails in adjourning counties.				
1855	A new Sheriff's residence was built with a wooden structure called "Kent County Jail House" in the rear. It consisted of heavy planking with sheet iron sheathing on the inside.				
1872	Rising crime and frequency of escapes from the current jail cause the county to construct a new jail in the "Bastille" style. When it opened in March, it was called the "Prisoner's Paradise."	114			
	Chairman of the Finance Committee of the Board of Commissioners called the jail a "cheese box" that had "first prize for being the most hazardous building in Michigan today."				
1950	Peak Average Daily Population reaches 162 inmates.				
1954	After several failed attempts over 4 decades, voters finally approve a ballot measure for a new jail.				
1958	Original Ball Avenue Jail constructed with a capacity of 240 beds.	240			240
1968	Honor Camp opens with a capacity of 48, bringing us to a total capacity of 288.	240	48		288
1974	Jail expansion by 116 beds, bringing us to a capacity in the Main Jail of 356. Total capacity for all jail facilities was 404.	356	48		404
1977	Jail expansion by 95 beds, bringing us to a capacity in the Main Jail of 451. Total capacity for all jail facilities was 499.	451	48		499
1977	61st District Court creates Community Service Program for sentenced misdemeanor cases.				
1979	Lawsuit filed by six inmates in U.S. District Court.				
1980	Formation of "Alternatives to Incarceration" task force.				
1980	We begin the practice of boarding out inmates to other counties due to overcrowding. This continued for 15 years.				
1981	Creation of Court Services Department to administer Pre-trial Release and Community Service programs. Post arraignment Pre- trial Screening begins at the jail.				
1982	Work Release facility created at the Salvation Army building with a capacity of 48 beds.	451	48	48	547
1982	Court Services Community Service program begins placing felony and misdemeanor cases to work in the community from all district courts and Circuit Court.				
1982	Federal Court order by Judge Enslen in the matter of Johnson v. Heffron limiting occupancy at the Main Jail to 95 percent of capacity.				
1983	Jail expansion by 122 beds, bringing the Main Jail to 573. Total capacity for all jail facilities was 669.	573	48	48	669
1984	Expansion of Pre-trial Release and Community Service programs. Pre-trial program now includes full-time supervision services.				
1984	Expansion of Work Release facility by 24 beds for a capacity of 72. Total capacity for all jail facilities is 693.	573	48	72	693
1984	Jail Management System approved for automating records at the Kent County Jail.				

History of Jail Capacity in Kent County (1985 to 1998)

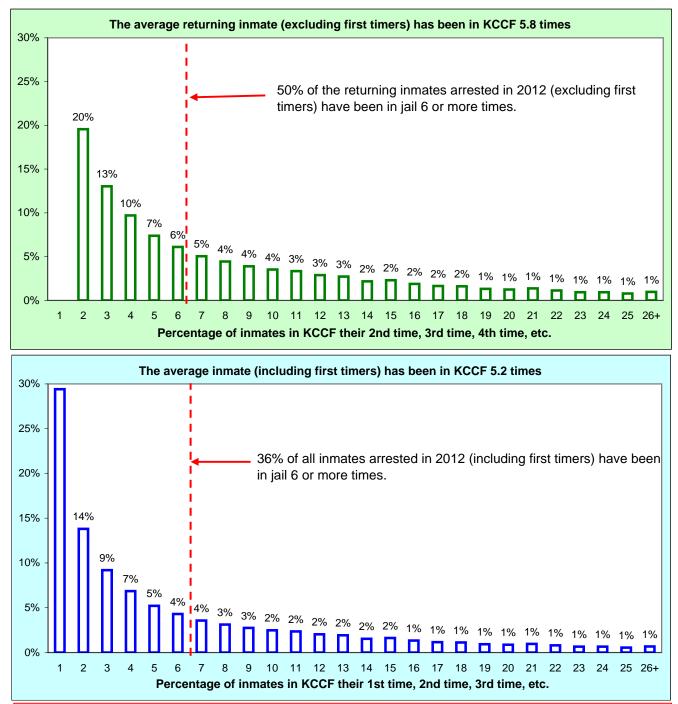

Year	Description of the Event or Solution		Capacit	ty Levels	
real	Description of the Event of Solution	MJ	HC	WR	System
1985	Agreement to house up to 25 females at Project Rehab Community Treatment Center.				
1985	Expansion of Work Release facility by 18 beds to a total capacity of 90. Total capacity for all jail facilities is 711.	573	48	90	711
1987	Jail Population Management Board formed to study causes of jail crowding.				
1987	Electronic Monitoring and Work Crew programs started with Federal Grant				
1988	Additional judge added for 17th Circuit Court				
1989	Formation of the Community Corrections Advisory Board pursuant to P.A. 511 of 1988.				
1989	Approval of Comprehensive Criminal Justice System Study by David M. Bennett.				
1989	Temporary minimum security jail building adding 64 beds to the Main Jail, bringing its capacity to 637. Total capacity for all jail facilities is 775.	637	48	90	775
1989	Expansion at the Work Release adds 14 beds for a total of 104 beds. Total capacity for all jail facilities is 789.	637	48	104	789
1990	This was the high year for the practice of boarding inmates in other counties. Daily average this year was 146.				
1990	Tax increase of 0.84 mills approved by voters on August 7th to construct a new jail addition.				
	Contract approved for jail architectural services.				
1990	Creation of Criminal Justice Coordinator position.				
1991	Pre-trial and Community Service program expanded to provide staff for additional numbers of supervised release cases and community service placements.				
1992	New jail addition opened in December but parts of the old jail are closed for renovation. We become the central intake facility for the Grand Rapids Police Department.				
1992	Pre-trial services expanded to include pre-arraignment screening and investigation and Fast Track processing 24 hours a day, 7 days a week coverage at the jail.				
1993	New jail addition and renovation of the old jail completed, adding 363 additional beds (after closing the temporary facility), bringing us to a capacity in the Main Jail of 1,000, and a total capacity of 1,152.	1,000	48	104	1,152
1993	Jail Bed Allocation Agreement begun, committee implemented, and weekly jail bed reports sent to all criminal court judges.				
1993	Temporary minimum security building relocated to Honor Camp. Capacity at Honor Camp remains at 48.				
1994	The practice of boarding inmates in other counties because of overcrowding finally ends this year after 15 years.				
1996	Order from the Federal Sixth Circuit Court granting relief from Judge Enslen's count reduction measures.				
1997	Pre-trial Electronic Monitoring program re-started after being discontinued in 1989.				
1997	Federal grant program enables Kent County communities to add large numbers of new police.				
1998	Research conducted into the issues surrounding adding double bunks to the Main Jail. 24 bunks added this year, beginning the capacity of the Main Jail to 1,024.	1,024	48	104	1,176

History of Jail Capacity in Kent County (1998 to present)

Year	Description of the Event or Solution		-	ty Levels	
		MJ	НС	WR	System
1998	Jail Population Monitoring Clerk begins monitoring split-sentence cases to facilitate early release into community facilities.				
1999	29 additional double bunks added for a total of 53, with a capacity of 1,053 in the Main Jail, and a total capacity of 1,205.	1,053	48	104	1,205
1999	Relocation of the Work Release facility from the Salvation Army to the old Kent Oaks facility, increasing the capacity to 136. Total system capacity is now 1,237.	1,053	48	136	1,237
2000	9 additional double bunks added for a total of 62, bringing us to a capacity of 1,062 in the Main Jail, and a total capacity of 1,246.	1,062	48	136	1,246
2002	32 additional double bunks added for a total of 94, with a capacity of 1,094 in the Main Jail, and a total capacity of 1,278.	1,094	48	136	1,278
2003	Two additional judges added for 17th Circuit Court.				
2003	Six additional bunks added to the Honor Camp, increasing its capacity to 54.	1,094	54	136	1,284
2004	Ten additional bunks added to Work Release, increasing its capacity to 146.	1,094	54	146	1,294
2004	Corrections and Detention Millage Committee formed				
2005	Two more bunks to the Honor Camp, capacity up to 56	1,094	56	146	1,296
2005	Corrections and Detention Millage Committee submits final report to County Administration in December.				
2005	Expansion project begins at Work Release and extra programs added. Building renamed the Community Reentry Center.				
2006	Expansion at the Community Reentry Center completed.	1,094	56	248	1,398
2006	Four more bunks added to Honor Camp, capacity up to 60	1,094	60	248	1,402
2006	90 additional double bunks added bringing us to a capacity of 1,184 in the Main Jail, and a total capacity of 1,492.	1,184	60	248	1,492
2006	Renovation started on the new Mental Health Unit. 53 bunks taken out of service.	1,131	60	248	1,439
2007	Criminal Justice Planners Harrison / Landmark present a report to County Administration in December that evaluates the jail's facilities and recommends demolition and expansion.				
2007	Mental Health Unit opened with 39 additional bunks, leaving us with a Main Jail capacity of 1,170 and a total capacity of 1,478.	1,170	60	248	1,478
2007	Kent, Kalamazoo and Allegan Counties hire a consulting firm to determine the feasibility of creating a regional jail.				
2008	Voters approve an extension of Jail Millage.				
2009	County selects Tower Pinkster as the design firm for the expansion and demolition project, and Owens, Ames and Kimble were selected as the construction firm. A jail transition team is formed and design work begins in mid-summer.				
2010	Renovation started on Upper Rear and D1B. Additional double bunks are added to B2 and B3. The Main Jail has a new temporary capacity.	1,101	48	248	1,397
2010	Using Honor Camp for inmate housing suspended in November.	1,101	0	248	1,349
	One wing of the CRC was closed the last week of December,				
2010	leaving two wings in operation. The newly renovated Upper Rear reopens in January as H2 with a	1,101	0	186	1,287
2011	new capacity of 192.	1,293	0	186	1,479
2011	The newly renovated D1B reopens in February with a new capacity of 46	1,331	0	186	1,517
2011	Lower One Man, Middle One Man, and Upper Annex are demolished in March.	1,221	0	186	1,407
2012	The new jail housing units open in December (L1, L2, L3, M1, M2, and M3). The old side (Lower, Middle and Upper) is closed.	1,285	0	186	1,471

Total Number of Times an Inmate has been in KCCF

Core Group of 2,800 Offenders Return to Jail 15 Times or More

These graphs were produced by looking at the 18,952 offenders arrested in 2012 and counting how many times they had been in the Kent County Correctional Facility since 1985. The point of producing these graphs side-by-side is to show the difference in the number of times in jail between the repeat offenders (the recidivists are in the top chart) and the whole population that includes the lightweights (bottom chart).

TalkingPoint! Of all the people brought to jail, 51% are there for their first, second or third visit. Among the offenders who came to jail in 2012, there was one inmate who had been in KCCF 124 times. Remember, these numbers are just counting the times these offenders were in the Kent County Jail and doesn't include visits to jails in other counties.

Recidivism Rate of KCCF Inmates

The previous page examines recidivism by looking backwards to see how many inmates have been in jail before. Another approach to looking at recidivism is examined on this page. This is a forward looking approach that looks at a group of admissions at a point in the past and then follows them in subsequent years to see how many of them come back a second time, third time, etc. We looked at an overall recidivism rate from 2010 through 2012 as well as recidivism when selecting out offenders who received a proxy score in 2011. We provided the jail data from those years to Andy Verheek at the Office of Community Corrections and he analyzed it for recidivism rates depicted on this page.

TalkingPoint! There were a total of 40,635 unique individuals booked into KCCF at least one time over the three year period from 2010 through 2012. Using a broad definition of recidivism entailing return to jail for any reason, 16,202 out of the 40,635 individuals were rebooked (for any reason) into KCCF at least once from January 1, 2010 through December 31, 2012. This represents an overall recidivism rate of 39.9%. Of these 16,202 individuals booked two or more times into KCCF, females were admitted an average of 3.1 times and males an average of 3.3 times.

	"Class of 2010 to 2012" - 69,779 individuals booked & rearrested anytime in 2010 to 2012							
	Total Individuals booked at least once anytime in 2010 through 2012	Number with at least one subsequent rebooking	Resulting Recidivism Rate					
All	40,635	16,202	39.9%					
Male	29,929	12,700	42.4%					
Female	10,706	3,502	32.7%					
Black	14,314	7,287	50.9%					
Hispanic	4,978	1,633	32.8%					
White	20,953	7,143	34.1%					

TalkingPoint! The table above includes people whose first arrest in the time period came in 2010 but also those whose first arrest was in 2011 and 2012 and includes a very broad definition of recidivism.. All offenders coming through the Kent County Correctional Facility are not predicted to recidivate at the same rate. Using a proxy risk assessment instrument that looks at an offenders age at first offense, prior bookings into jail, and current age, Kent County Correctional Facility personnel can gain an idea of who is more likely to come back through the system in the future. This information is instrumental to providing programming within the Kent County Correctional Facility. In the table below we looked at the recidivism rates for those individuals that were booked into KCCF from January 1, 2011 through December 31, 2011 that received a proxy score and were most likely to be released back into the community meaning that those offenders released to prison or another facility were filtered out. There were 7,113 individuals booked into KCCF in 2011 that had received a proxy score during their stays at Kent County Correctional Facility and had a release reason other than release to prison or release to another facility. Out of these 7,113 individuals, 4,780 were rebooked into KCCF at least once from their initial booking in 2011 until December 31, 2012 for an overall recidivism rate of 67.2%. The table below illustrates that the recidivism rates are indeed different for those offenders scored at a low, medium, or high risk of recidivism based upon the proxy risk assessment instrument.

"Cla	"Class of 2011" - 7,113 individuals booked in 2011 and their rearrests later in 2011 through 2012							
	Low Risk of Recidivism 934 total individuals	Medium Risk of Recidivism 3,123 total individuals	High Risk of Recidivism 3,056 total individuals					
Recidivism	47.1%	62.5%	78.1%					
Male	660 total individuals	2,473 total individuals	2,638 total individuals					
Rate	45.5%	62.2%	78.4%					
Female	274 total individuals	650 total individuals	418 total individuals					
Rate	51.1%	63.7%	76.8%					
Black	215 total individuals	1,348 total individuals	1,732 total individuals					
Rate	51.2%	64.8%	83.0%					
Hispanic	159 total individuals	318 total individuals	269 total individuals					
Rate	36.5%	56.3%	72.1%					
White	544 total individuals	1,431 total individuals	1,036 total individuals					
Rate	49.1%	61.6%	71.6%					

Recidivism Info - Including Likelihood of Recidivating

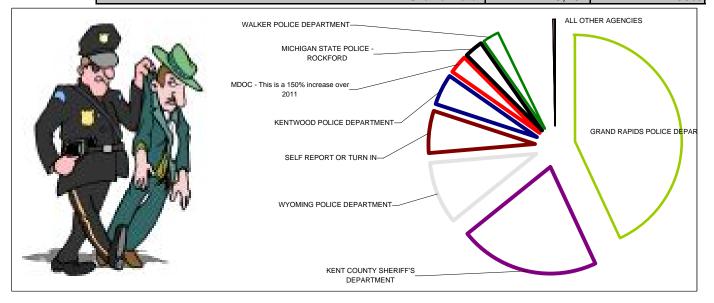

F TalkingPoint! Additional information regarding regarding the recidivism of individuals booked into KCC between 2010 and 2011:	F
An offender with a 2010 booking event experienced a total of 43 separate bookings between 2010 and 2012.	
 Overall, male offenders were booked an average of 2.0 times and female offenders were booked an average of 1.7 times. Black offenders were booked an average of 2.3 times, hispanic offenders were booked an average of 1.7 times, white offenders were booked an average of 1.7 times. Average (median) length of time between an offender's first and second bookings was 147.8 days for male offenders. Average (median) length of time between an offender's first and second bookings was 153.3 days for black offenders. Average (median) length of time between an offender's first and second bookings was 153.3 days for black offenders. 	.7
Black offenders were booked an average of 2.3 times, hispanic offenders were booked an average of 1.7 times, white offenders were booked an average of 1.7 times.	and
Average (median) length of time between an offender's first and second bookings was 147.8 days for male offe and 151.1 days for female offenders.	nders
Average (median) length of time between an offender's first and second bookings was 153.3 days for black offenders.	nders,
TalkingPoint! In 2010 Kent County began using an instrument to predict the likelihood of an inmate booked KCCF returning to jail at some point and time in the future. This "Proxy" instrument divides the inmates into three leve with R1's being the least likely to return to jail, R3's being the most likely to return to jail, and R2's being in the middle. The breakdown of Proxy scores for the offenders: R1: 10.1% // R2: 38.1% // R3: 51.8%	ls,
Looking at those offenders that received a low category proxy score (R1) from the Recidivism Since 2010 page offenders averaged 2.7 bookings while female offenders averaged of 2.6 bookings. Looking at those offenders received a high category proxy score (R3) from the same page, the average number of bookings for males incre 3.7 bookings while the average for female offendes increases to 3.8 bookings.	that
Looking at those offenders that received a low category proxy score (R1) from the Recidivism Since 2010 page offenders averaged 2.7 bookings, whites averaged of 2.6 bookings, and hispanics averaged of 2.7 bookings. Sw to those offenders receiving a high category proxy score (R3) from the same page, the average for black offender increases to 3.9 bookings, the average for white offenders increases to 3.6 bookings, and the average for hispan offenders increases to 3.4 bookings.	vitching ers
Looking at those offenders that received a low category proxy score (R1) from the Recidivism Since 2010 page average (median) length of time between an offender's first and second bookings was 111.8 days for male offer and 124.2 days for female offenders. Switching to those offenders receiving a high category proxy score (R3), average (median) length of time between an offender's first and second bookings decreases to 102.2 days for male offenders and 85.8 days for female offenders.	nders the
Looking at those offenders that received a low category proxy score (R1) from the Recidivism Since 2010 page average (median) length of time between an offender's first and second bookings was 110.7 days for black offe 92.6 days for hispanic offenders, and 119.6 days for white offenders. Switching to those offenders receiving a category proxy score (R3), the average (median) length of time between an offender's first and second bookings decreases to 96.1 days for black offenders and 99.9 days for white offenders while it increases to 114.9 days for hispanic offenders.	nders, nigh
TrendSpotter! The numbers below show a very interesting decline in the number of offenders coming to jail for the first time.	
 2006 13,635 offenders were booked into jail for the first time during 2006 2007 12,920 offenders were booked into jail for the first time during 2007 (5.5% decline from 2006) 2008 10,702 offenders were booked into jail for the first time during 2008 (17.2% decline from 2007) 2009 9,541 offenders were booked into jail for the first time during 2009 (10.8% decline from 2008) 2010 7,894 offenders were booked into jail for the first time during 2010 (17.3% decline from 2009) 2011 7,445 offenders were booked into jail for the first time during 2011 (5.7% decline from 2010) 	

2012 5,416 offenders were booked into jail for the first time during 2011 (5.7% decline from 2010) **2012** 5,416 offenders were booked into jail for the first time during 2012 (27.2% decline from 2011)

Number of Inmates Brought to Jail in the Last 12 Years by the Top Five Arresting Agencies Most Agencies Reduce Arrests

TrendSpotter! All five of these arresting agencies continued a trend of reduced numbers of offenders they arrested and brought to jail during the year. The peak for Grand Rapids, Kent County and Wyoming was in 2003. MSP peaked in 2005 and Kentwood in 2006. Kentwood was the only agency that increased this year.

Inmate Classification System Computerized Decision Tree Aids Placement Decisions

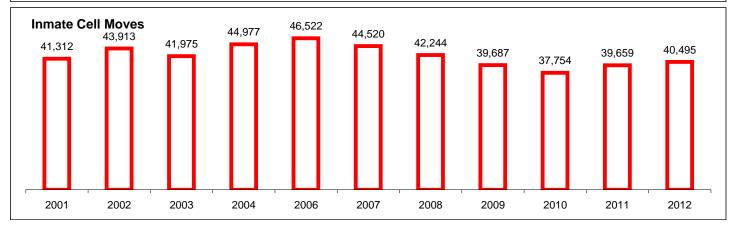

Midway through 2004 the jail began using a new Jail Management System called JailView. JailView uses the Northpointe® decision tree classification instrument which breaks inmates down into the traditional three categories of Maximum, Medium and Minimum, but it also provides nine levels of sub-categories that are useful for making program and placement decisions. Below is a brief definition of each of the custody levels and the average number and proportion of inmates within each classification.

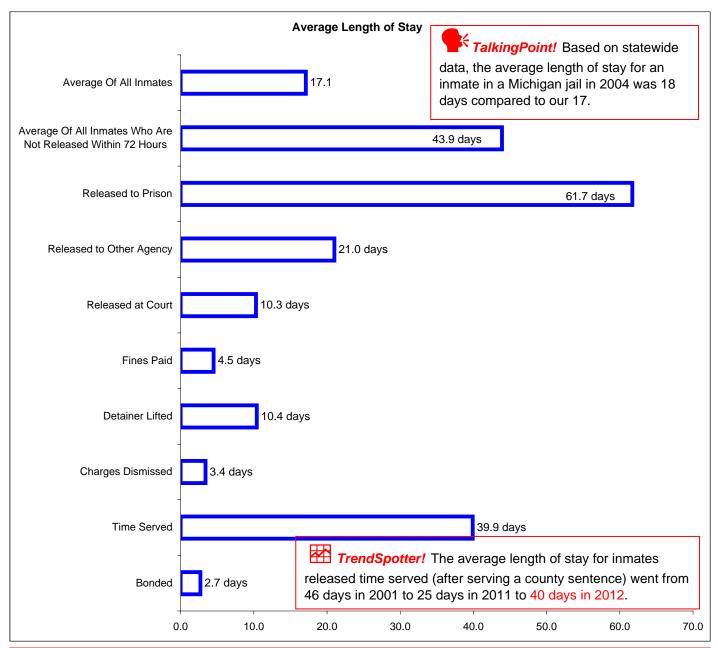

Custody Level	Definition	Main Jail Males	Main Jail Females	Jail System (M & F)	
High (1)	These inmates are in jail on a violent charge, with a prior conviction on a violent charge, and with a record of violent institutional behavior.	2 (0%)	0 (0%)	2 (0%)	
Close (2)	These inmates have a combination of two incidents of violence found in either their current charge, past charges or institutional behavior record.	34 (4%)	4 (3%)	38 (3%)	
Medium Assaultive (3)	These inmates have one incident of violence in either their current charge, past charge or institutional behavior.	155 (18%)	10 (8%)	166 (15%)	
Medium (4)	These inmates are in jail for a serious non-violent felony and/or have institutional behavior problems.	283 (33%)	40 (37%)	324 (29%)	
Medium Pre-Sentenced (5)	These inmates are likely prison bound, but they are well behaved and have no record of violence or rule violations.	72 (8%)	5 (4%)	78 (7%)	
Minimum Pre-Sentenced (6)	These inmates will likely not go to prison and are well behaved with no record of violence or rule violations.	142 (16%)	24 (22%)	176 (16%)	
Minimum (7)	These inmates are fully sentenced to county jail time on a felony charge, have no recent history of violence and are well behaved, but they lack employment or ties to the community.	89 (10%)	11 (10%)	166 (15%)	
Low (8)	These inmates are sentenced to the county jail on a felony charge, have no recent record of violence, are well behaved and have employment or local ties to the community.	78 (9%)	12 (11%)	133 (12%)	
Very Low (9)	These inmates are sentenced to the county jail on misdemeanor charges, have no recent record of violence, are well behaved and have ties to the community.	6 (1%)	2 (2%)	13 (1%)

Average Amount of Time Inmates Stay in Jail, Shown with Inmates Grouped by Release Type

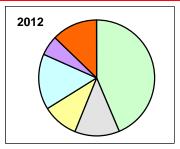

The graph above was based on a sample of 24,835 inmates released in 2012.

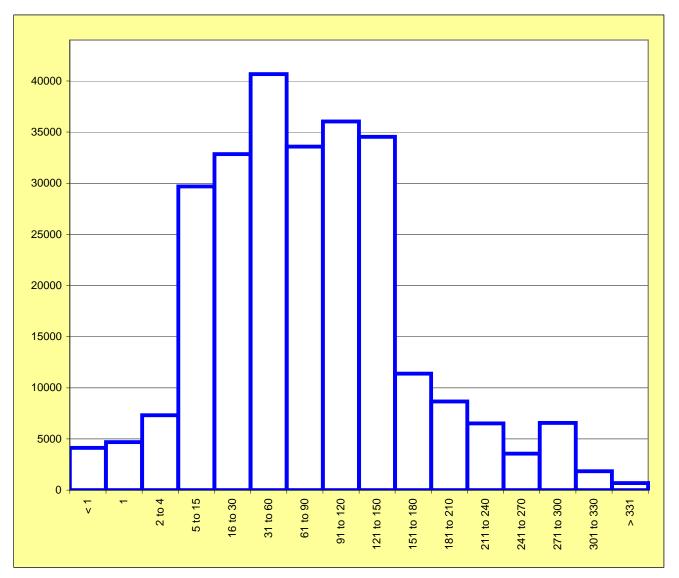

TalkingPoint! The pie charts below contain a comparison of the Average Length of Stay (ALOS) at the time of the Bennett jail expansion study and the ALOS in 2012, depicting the much shorter ALOS in 2012.

	1989	2011
< 1 day	28.17%	43.49%
1 day	13.55%	12.60%
2 to 4 days	12.90%	10.14%
5 to 15 days	14.84%	15.36%
16 to 30 days	6.24%	5.71%
> 30 days	24.30%	12.69%

Average Length of Stay Depicted as Jail Bed Days

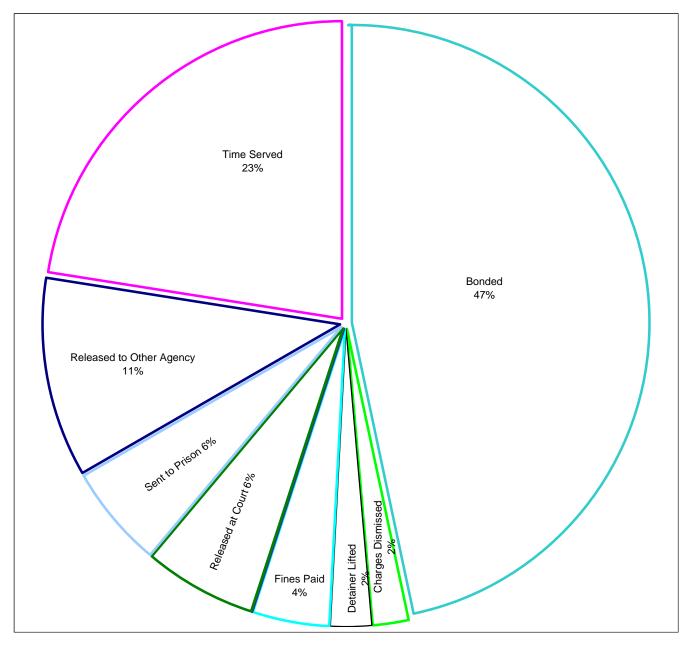

TalkingPoint! This chart shows the concept of average length of stay depicted as Jail Bed Days. Jail Bed Days are an accurate way of displaying the actual impact on jail beds, because it is counting the days that a jail bed is occupied. The chart about shows that although we had 10,802 people who stayed less than one day in jail, they used far fewer jail beds than the 3,816 inmates who stayed 5 to 15 days in jail. In fact, the 1,014 inmates who stayed 31 to 60 days used the most jail beds. The main interpretation of these data is that the greatest impact on jail capacity would be achieved by concentrating our efforts on reducing the stay of the inmates who are in jail from one to five months. It is that group of inmates who are using most of the jail's beds.

# of Days in Jail	# of Inmates
< 1	10802
1	3130
2 to 4	2519

Reasons Why Inmates are Released and the Percentage of Inmates Released in the Most Common Types of Releases

The Majority of Incoming Inmates Released Back to the Community

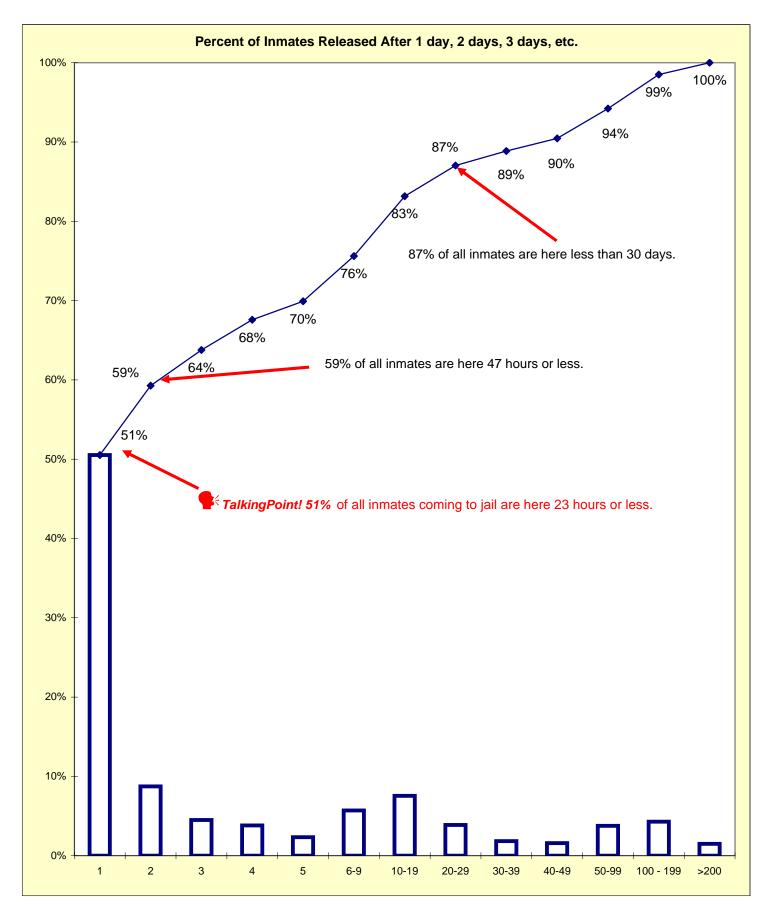

FalkingPoint! 83% of the inmates who come into our jail are released directly back into the community. (This chart is based on a sample of 24,000 records in 2012.) Only about 17% get sent to prison or to another agency. Hard data is not available on that 17%, but probably most of those inmates return to our community at some point. It is important to remember that resources devoted to local jail inmates benefit our local communities.

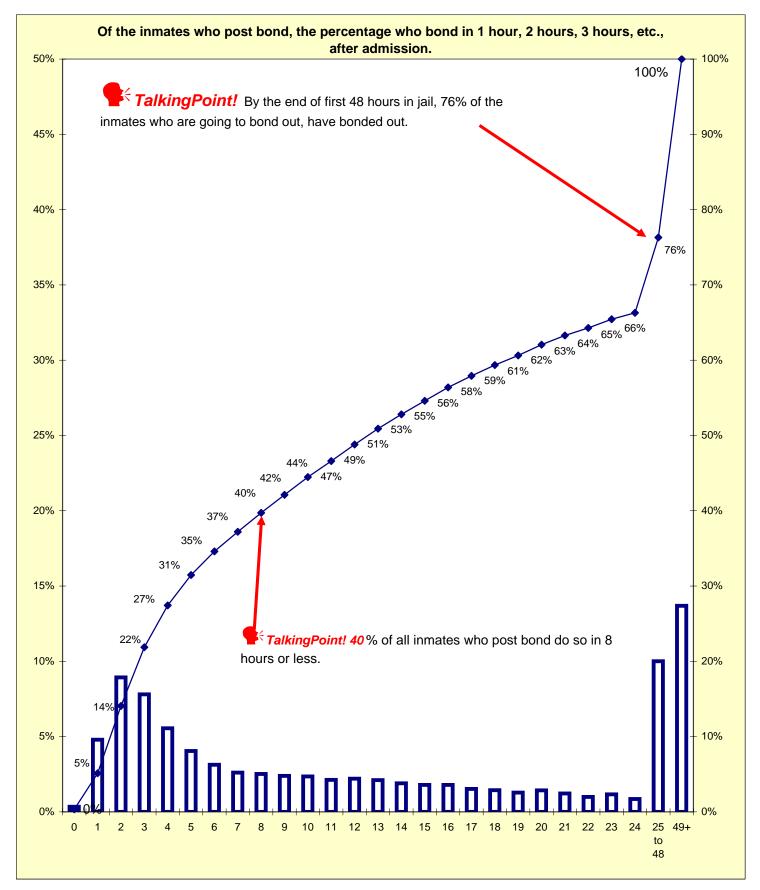

Number of Days Inmates Spend in Jail Before Release

87% of All Inmates Are in Jail Less than 30 Days

Number of Hours Inmates Spend in Jail Before Being Released on Bond

76% of All Inmates Who Post Bond, do so Within the First 48 hours

County Jail Reimbursement Program Fiscal Year 2012 Update by Andy VerHeek

CJRP reimbursement and eligibility criteria witnessed yet another change within the program during FY 2012 that impacted the funds received by Kent County. The table below shows that Kent County witnessed an increase of funds received through CJRP from \$835,895.50 in FY 2011 to \$928,264.50 in FY 2012.

Highlights of these changes from FY 2011 to FY 2012 included:

1. All counties in Michigan in FY 2012 were required to follow the same eligibility and reimbursement criteria. There was no choice as there was in FY 2011.

2. During FY 2012 there were three different reimbursement amounts depending upon the offender's sentencing guideline score and type of offense.

4. Save for a few select offenses, FY 2012 eligibility criteria essentially eliminated Crime Class F offenses that were eligible for reimbursement during FY 2011.

In addition to these changes, CJRP monies received by Kent County are impacted by the length of stay in the Kent County Correctional Facility for each offender as well as the jail disposition rate for CJRP-eligible offenders sentenced in Kent County.

FISCAL YEAR	CJRP PAYMENT	TOTAL RECEIVED
1994	\$513,520.00	\$513,520.00
1995	\$863,265.00	\$1,376,785.00
1996	\$764,628.00	\$2,141,413.00

TalkingPoint! The information on this page is based on KCCF inmates' top charge (the most seriouse charge) and it depicts the difference in the charge severity between the offenders who come into and out of jail (the "booking" population) and those who stay in custody (the "stock" population). The stock population generally is made up of inmates with more serious charges than the booking population.

TalkingPoint! The

information on this page is based on the top charge of over 26,000 offenders who were released from jail in 2012, with some having multiple charges. The Jail Bed Days represents the total number of days these offenders stayed in jail. For example, 1 offender sitting in jail for 1 day is equal to 1 Jail Bed Days. 200 offenders in jail for 5 days each is each to 1,000 Jail Bed Days. The purpose of the table and chart on this page is to depict what type of offender uses the most Jail Bed Days, and to show that it is not just the crime category with the most number of inmates. The table at left is sorted by the "average" jail bed days per offender of each charge type. This year, as in prior years, the category of offender that uses the most total jail bed days are the 6,454 offenders charged with crimes that fall into the "disorderly" classification.

1998 1999	9 200	00 20	01 2	002 2	2003	2004	2005	2006	2007	2008	2009	9 20 [.]	10 20	011 2	2012

With fluxations in the jail population, converting Incident Based data to the number of rule violations committed per 1000 Jail Bed Days gives a more accurate picture of inmate behavior.

Total Number of Category 1, 2 and 3 Rule Violations in the Last Eleven Years

These graphs show the number of Category 1, 2, and 3 reports per year for the last few years. We have three levels of disciplinary rule violations in the jail. The most minor rule violations are Category 1 violations. Category 2 violations are more serious and Category 3 violations are the most serious. Our disciplinary philosophy is that we would rather deal with an inmate's misbehavior while it is still minor, which is why there are more Category 1 violations than 2's, and more 2's than 3's. Inmates committing Category 2 and 3 violations go to the jail's Disciplinary Segregation Unit to complete their disciplinary sanctions. This chart includes only those rule violations that occurred in the Main Jail.

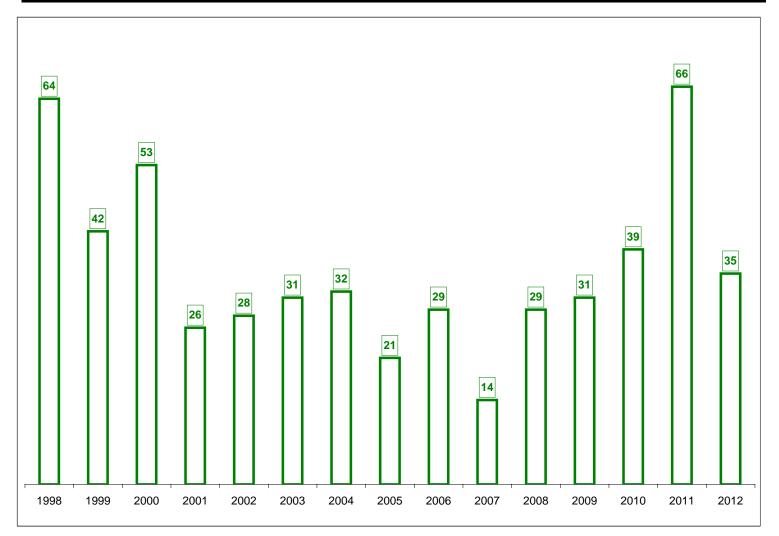

Index of Antisocial Inmate Behavior Grouping of Rule Violations that Have to Do with Impolite or Socially Unacceptable Behavior

Each of the inmate rule violations is identified as targeting one of five types of unwanted behavior. Grouping the violations like this and considering the totals of each group provides us with an index used to determine what types of behavior can best be controlled by the kinds of sanctions we have available to us. This page shows the violations which are considered to be **antisocial behavior**.

Index of Destructive Inmate Behavior Grouping of Rule Violations that Have to Do with Damaging Property

"Destructive" acts	1998	1999	2000	2001	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012

Each of the inmate rule violations is identified as targeting one of five types of unwanted inmate behavior. Grouping the violations like this and considering the totals of each group provides us with an index used to determine what types of behavior can best be controlled by the kinds of sanctions we have available to us. This page shows the violations which are considered to be **related to the security of the facility**. This time period shows a significant reduction in this type of unwanted inmate behavior.

Security Behavior

Index of Violent Inmate Behavior Grouping of Rule Violations Relating to Violent or Aggressive Behavior

"Violent" behavior	1998	1999	2000	2001	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012

Each of the inmate rule violations is identified as targeting one of five types of unwanted inmate behavior. Grouping the violations like this and considering the totals of each group provides us with an index used to determine what types of behavior can best be controlled by the kinds of sanctions we have available to us. This page shows the violations which are considered to be **violent behavior**.

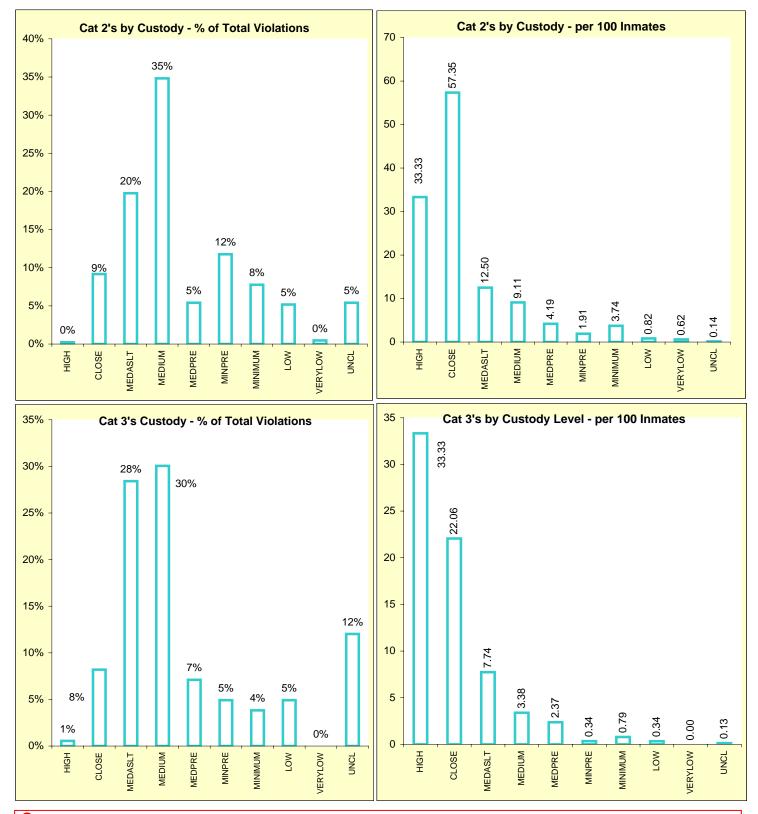

Comparison - Index of Inmate Behavior

Compilation of the Previous Five Charts

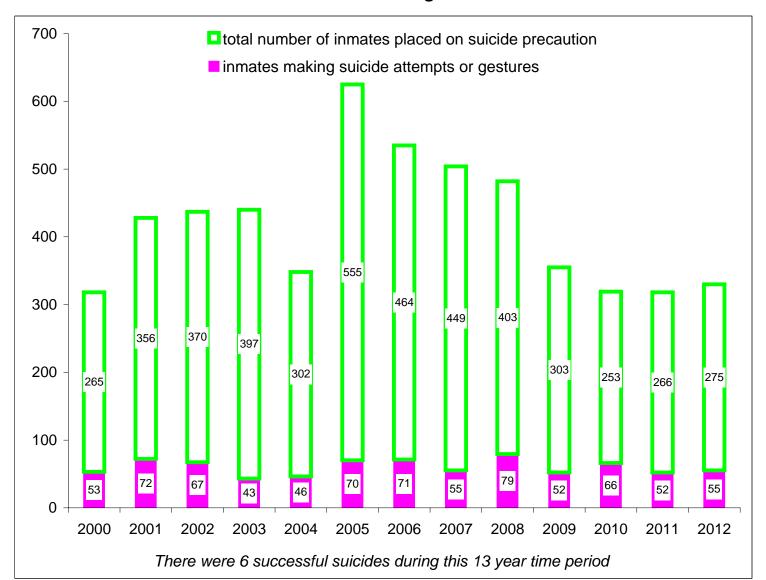

This chart shows all five of the inmate behavior index's and how they performed over the last 15 years. This is a compilation of the data used in the previous five charts. Each category showed significant variation over this period. Keep in mind that the overall number of inmates in the Sheriff's custody decreased during the last few years.

Category 2 and 3 Violations by Custody Level

TalkingPoint! Category 2 rule violations are less serious, while Category 3 are the most serious. The rate "per 100 inmates" is the best overall measure, since there are fewer higher custody inmates than lower custody. These figures were calculated using 2012 data. These stats are just from the Main Jail and include just the 10 most serious violations in each category. These charts demonstrate the validity of our classification system, as it shows the system is correctly identifying the inmates most likely to commit a rule violation.

Suicide Attempts or Gestures Compared with the Total Number of Suicide Precautions KCCF 2000 through 2012

	2000	2001	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012
inmates making suicide attempts or gestures	53	72	67	43	46	70	71	55	79	52	66	52	55
total number of inmates placed on suicide precaution	265	356	370	397	302	555	464	449	403	303	253	266	275

Our highest level of suicide precaution places inmates in a cell under constant video surveillance. We track how inmates get placed on that level of observation. Either they have made a suicide attempt or gesture, or they have made a suicidal threat to a staff person, or they have been judged to be suicidal following an interview by one of our mental health professionals. The chart above depicts the total number of "S-3's" (the highest level of precaution) and of that number, the number that were declared S-3's because of an actual in-progress attempt to harm themselves, either by hanging, an overdose, cutting themselves, jumping from a height, drowning in a toilet, banging their head, or some other means. These data show that the jail deputies intervene in about one suicide attempt each week.

Housing Unit	Number of Cat 2/3's	Index of Population

B3F Female Med Asslt / Maximum	45	2.813

Inmate Behavior per Pod or Housing Unit Minimum Custody Inmates Continue to be Best Behaved

We have a number of separate housing units in the mail jail (their designations appear in the first column). We keep track of the number of inmates who must be moved out of each housing unit and placed in Disciplinary Segregation for a category 2 or 3 violation. We divide the number of rule violations by the number of inmates living in the housing unit to get an index for comparison purposes (this is the number in the third column). The lower the index, the better behaved the housing unit is. As you can tell from this table, the minimum (MINM) custody housing units are generally better behaved than the medium (MEDM) custody units, which are better behaved than the maximum (MAXM) custody units. The classification pods hold inmates who have not yet been assigned a custody level. The "Male Mental Health Unit" houses inmates with serious mental illness. Lower floor was left off since it was closed for most of 2012.

Have you ever experienced auditory, visual, olfactory,	3.0%	2.9%	2.6%	2.5%	2.4%	2.4%	3.0%	0.7%
or tactical hallucinations?								
Has inmate ever had or experienced delusional	0.4%	0.3%	0.3%	0.3%	0.2%	0.2%	0.4%	0.1%

TalkingPoint! Every offender brought to jail is evaluated by a medical professional while still in Intake. The percentage of the mental health survey questions that were answered YES appear on this table. The data in this table is based on the approximately 26,000 offenders each year who came to jail during these years. The form changed which is why there are now some blanks.

Inmate Needs Reported in Classification Interview Offenders Come to Jail with a Number of Needs

Question:	% Yes	% No
1. HEALTH ISSUES: Does this inmate report having any unresolved medical issues which would require you to contact medical, or does this inmate have any health problems that would affect their housing?	21.9%	78.1%
MENTAL STABILITY: Does this inmate have mental health problems, including suicidal ideation, that would affect their housing?	15.5%	84.5%
3. ALCOHOL ABUSE: Does the inmate admit to having an alcohol problem, or does the inmate appear to have an alcohol problem in your judgement?	19.5%	80.5%
4. DRUG ABUSE: Does the inmate admit to a drug problem, or does the inmate appear to have a problem with drugs in your judgement?	20.7%	79.3%
5. PAST TREATMENT: Does the inmate indicate past treatment for their drug or alcohol problem? If so, record where, when, and if they are interested in continuing treatment.	30.8%	69.2%
6. EDUCATIONAL HISTORY: Does the inmate have a GED or a high school diploma? If not, is the inmate interested in continuing their education in the main jail or honor camp?	67.5%	32.5%
7. VOCATIONAL SKILLS: Does the inmate have a marketable skill or trade that is used to support himself and his family? (Answer "Yes" if this is true, and "No" if is the inmate has no skills, limited training, or little or no employment history.)	17.3%	82.7%
8. LITERACY: Can this inmate read and write the English language?	99.5%	0.5%

TalkingPoint! These numbers represent the percentage of inmates in population who admit these needs to a classification officer. This information is based on the self report of the inmates during their classification interviews this year. It is not based on a clinical assessment and the report is not verified independently. This reflects an inmate's "admission" only. Not all inmates honestly report their needs at the classification interview. All inmates who stay in jail longer than 3 days are given a classification interview.

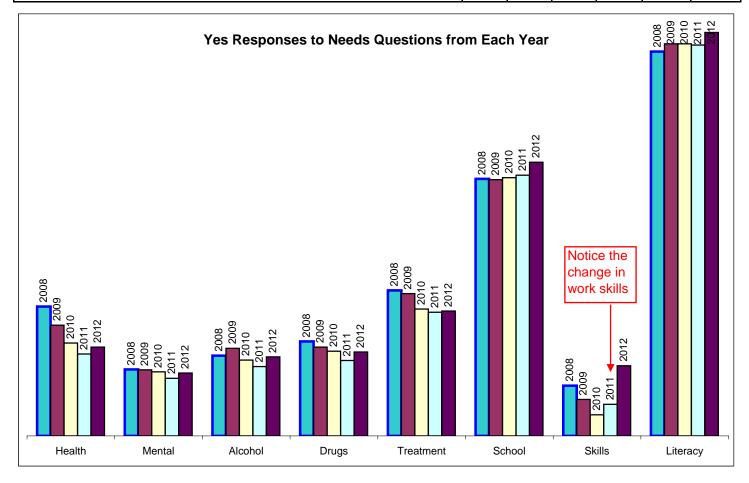

Needs Survey Summary

Inmate Needs Reported in Prior Years

Offenders' Needs Remain Steady

Question:	2007	2008	2009	2010	2011	2012
1. HEALTH ISSUES: Does this inmate report having any unresolved medical issues which would require you to contact medical, or does this inmate have any health problems that would affect their housing?	33.0%	31.9%	27.3%	22.9%	20.2%	21.9%
2. MENTAL STABILITY: Does this inmate have mental health problems, including suicidal ideation, that would affect their housing?	15.1%	16.4%	16.3%	15.8%	14.2%	15.5%
